- Toll milling and processing of the first 36,000 tonnes ore parcel completed.
 - 7 doré bars have been dispatched to Perth Mint for final refining.
 - Total ounces from first toll milling program to be advised as soon as possible.
 - First cash to Auric expected September/October 2023.
-

The Announcement

Auric Mining Limited (ASX: AWJ) (Auric or the Company) is pleased to announce the toll milling and processing of the first parcel of gold ore has been completed.

All gold doré from the first milling campaign is at the Perth Mint, where final refining will be undertaken.

"Today is an exciting milestone for Auric and our shareholders. We have gone from purchasing Jeffreys Find to mining it and producing gold within 2.5 years of our ASX listing. There is a lot more work to be done, results to be received and cash generated from this stage one mining of Jeffreys Find." said Auric's Managing Director Mark English.

BML are incurring and paying all mining costs and expenses. After completing the first phase of mining the partners will subtract all costs, including a cash retention for the second stage, before splitting the surplus cash proceeds on a 50:50 basis. This will provide Auric with a substantial cash boost, expected in September/October 2023.

The project is on target to achieve its first phase ambition of mining and processing 150,000 to 180,000 tonnes from the mine.

The total project life is short and final mining is expected to be completed by the end of 2024/early 2025. The project budgeted for a gold price of AUD\$2,600/ounce. A substantially higher gold price, currently AUD\$2,950/ounce, has now placed the joint venture in a more favourable position.
